

The Manomat and Automat models from the Rondo Doge range of dough sheeters have continually met highest requirements. Being of robust, reliable and durable construction they are easy to use.

Manomat and Automat have the famous synchro-drive system. This prevents the overfeeding, shrinking or tearing of the thinnest of dough sheets. The tried and tested Rondo Doge scraper system allows to work with a minimum of dusting flour even for thinnest dough sheets.

Technical data Manomat SSO 675

1. Substructure	A-frame
Automatic flour duster	optional
Width of conveyor belts	635 mm
Table length overall	2720 mm
Roller length	660 mm
Roller gap	0,5 - 45 mm
Speed of discharge	60 cm/sec.
Rated power	1,5 kVA
Supply voltage	3x200-420V, 50/60 Hz
Required floor space in working position	1215 x 3200 mm
Required floor space in resting position	1215 x 1440 mm

Technical data Automat SSO 685

Substructure	A-frame
Automatic flour duster	optional
Width of conveyor belts	635 mm
