

A new member of the C-family:

The new CS single rack oven

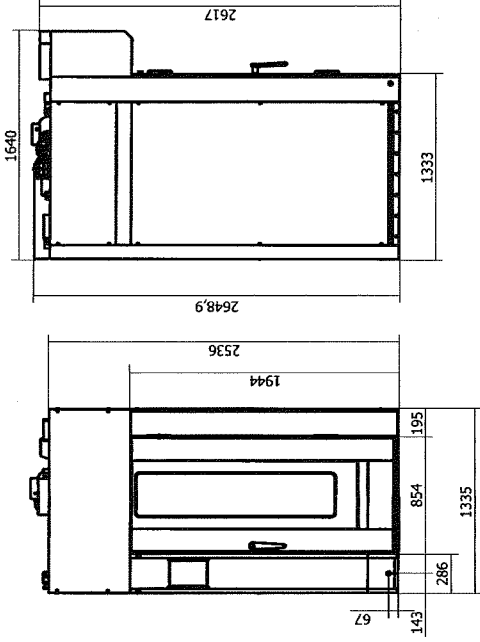

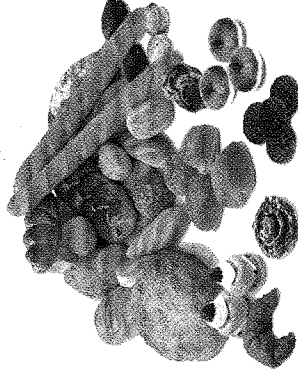

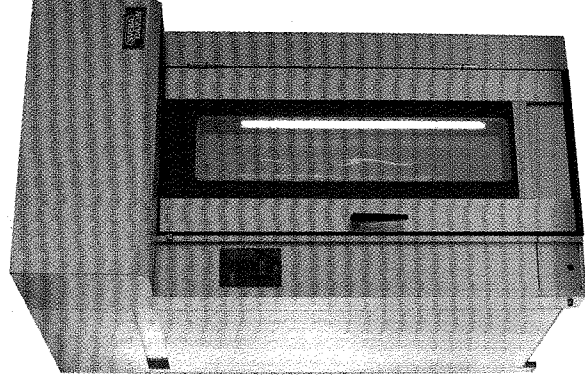

This new addition to the Sveba-Dahlen rack oven range is primarily a in store oven for supermarkets, this model always comes delivered in one piece to make installation and start up as quick and trouble free as possible.

The heat package is located at the top of the oven making the foot print very small so that the oven takes up a minimum space in the bakery.

With the small foot print and a very efficient heating package makes this oven very economical to have and to operate.

The rotation unit is all in one piece, this makes the running of the oven very quiet and maintenance is kept to a minimum.

The steam package is built up in sections which make it very easy to maintain and clean.

Standard features:

- Canopy
- Double glazed window
- E-panel
- Hook
- Power-driven damper
